SPLITS

Taking the hassle out of cold room & freezer room selections

Overview

Fridgesplits are a range of competitive refrigeration systems, designed to take the guess work out of cold room and freezer room selections. Each fridgesplit uses the market leading Danfoss Optyma Slim condensing unit which has been perfectly matched to an ECO evaporator.

The fridgesplit comes with a 3 year warranty that is unique to our trade and it's offered with a range of installation & controller kits that offer high quality Danfoss components at fantastic prices.

Specification

Quick & Safe Installation & Service

Enjoy fast and easy installation with the mains switch, service valves, and quick connections. In addition, the easy-to-clean Microchannel condenser saves you time and effort on servicing.

High SERN

All models in the range are highly efficient and well above EcoDesign 2018 thresholds, contributing to a reduction in energy costs.

Suitable for Residential Areas

Optyma operates up to 7 dB(A) lower than other packaged units of the same capacity and the fan-speed controller further reduces the sound level by up to 4 dB(A) for low load / ambient conditions.

Optimised Footprint for Floor & Wall Mounting

Thanks to its slim design and low weight, it is easy to transport and handle during installation - particularly for wall mounting. Minimal footprint means to increase the number of potential locations.

Micro Channel Heat Exchanger

Economically designed to reduce the refrigerant charge needed. Corrosion resistant, suitable for use in coastal areas, providing extensive service. Slimmer than traditional condensers, the units are easier to clean and weigh less.

Low GWP Refrigerant

All systems are designed to use the best low GWP refrigerant available. For MT applications R449A is required and for LT systems R452A.

Installation & Controller Kits

Each system has installation kits designed specifically to offer high quality components at very competitive rates.

Quality Components

The units use Danfoss components which are renowned for their quality and performance. This increases reliability which in turn manages down future running costs.

3-Year Extended Warranty

All Fridgesplit systems come with a standard warranty period of 3 years!

Danfoss Optyma™ Slim

Accessible Fan

Accessible fan and condenser for easy maintenance.

Micro Channel Heat Exchanger

Micro-channel heat exchanger is light and easy to clean.

Corrosion Resistant

Resistance to corrosion of the heat exchanger and housing prolongs the lifetime of the unit.

Quick Connections

Quick connections accelerate installation: just mount, braze & plug.

Filter Drier & Sight Glass

Filter drier and sight glass protect the unit from moisture, acids and solid particles. Flare connections simplify maintenance.

Accessible Service Ports

Accessible service ports on service valves (suction and liquid).

Schrader Valve

Thanks to the Schrader valve the unit is compatible with various fan control devices.

Dual Pressure Control

Dual KP17WB pressure control for enhanced safety.

Receiver With Shut-Off Valve

Receiver with shut-off valve makes servicing easier.

Crankcase Heater

Crankcase heater protects the compressor when operating under cold weather conditions.

The Optyma™ Slim matches with the following evaporators:

ECO EVS Compact Cooler

ECO GME Wedge Cooler

ECO GCE Box Cooler

These high quality evaporators have casings made from magnesium aluminium alloy which provides a high class appearance combined with durability and ease of cleaning. The coil design uses 'aerulic' principles to maximise the transfer of heat using pressurised air.

This results in a compact design for the refrigerating capacity. Heaters and fan motors are connected to an IP54 terminal box that is easily accessible.

Air Flow Configuration

Wedge / Compact Cooler
